

12/17/07
Please replace the paragraph starting on page ¹²~~11~~, line ¹~~24~~ with the following paragraph:

9 mL of sterile D/E neutralizer broth was added to the test tube and mixed to form a 10^{-1} dilution[[],]. Serial dilutions were prepared through to a 10^{-6} dilution with phosphate buffered water. The serial dilutions were plated onto Tryptic Soy Agar and incubated for 2 days at about 35°C. Bacteria counts were performed after 0 and 14 days. The results are shown in Table 1.
